```groovy
// declare task
task sns {
    doLast {
        ant.taskdef(name: 'sns',
                classname: 'de.renew.task.CreateShadownetsTask',
                classpath: configurations.dist.asPath)
    }
}

//configure task
sns {
    doLast {
        ant.sns(compilername:
"de.renew.feature.structures.formalism.fsnet.XFSNetCompiler",
                compile: "false",
                destdir: "$buildDir/resources/main/sns",
                classpath: configurations.dist.asPath) {
            fileset(dir: "$sourceSets.main.output.resourcesDir/ontology") {
                include(name: '*.rnw')
            }
        }
    }
}
```
