```groovy
jar {
    group "renew"
    baseName moduleName
    doFirst { task ->
        println "$task.project.name in progress"
    }
    from sourceSets.main.output.classesDirs
    from sourceSets.main.resources exclude("*README*")
    afterEvaluate { Project project ->
        doLast {
            println("$project.name Created: " + project.tasks.getByName('jar').archiveName)
        }
    }
}
```
